Experiment 4: Performing Qualitative Risk Assessments

Objective

To carry out a qualitative assessment of an identified business risk in Eramba by rating its Likelihood and Impact and reviewing the resulting risk score.

Steps Followed

1. Opened Risk Management and then Business Risks in Eramba.
2. Selected the Business Interruption risk entry.
3. Opened the Analysis tab for the risk.
4. Set/reviewed the Likelihood and Impact ratings.
5. Checked the Risk Analysis Score generated automatically from those ratings.
6. Saved the completed assessment.

Assessment Result

- Likelihood: Medium
- Impact: Very High
- Risk Analysis Score: 6
- Business Unit: Operations

Outcome

The Business Interruption risk was successfully assessed on a qualitative basis in Eramba, with the risk score calculated automatically from the chosen Likelihood and Impact values.
