Experiment 5: Control Implementation and Compensating Control Attestation

Objective

To set up security controls within Eramba and confirm their audit and attestation configuration.

Steps Followed

1. Opened Control Catalog and then Internal Controls.
2. Created and imported a set of internal controls.
3. Opened the Privileged Account Monitoring control for review.
4. Went to Edit and then the Audits tab.
5. Set the audit date and assigned an Audit Owner and Audit Evidence Owner.
6. Reviewed the audit methodology and the defined success criteria.
7. Saved the control record.

Outcome

Ten internal controls were created in total, and an audit/attestation plan was configured for the Privileged Account Monitoring control, confirming that controls can be implemented and their audit status tracked within Eramba.
